

WHAT DO OUR PATIENTS THINK?

I hadn't heard of CSF, and that's the saddest part of this whole situation. "There's no way this is true," my brothers said. But that definitely doesn't apply to CSF.

When they told me "cancer," I thought I wouldn't live; I was on that edge where you face mortality. But the confidence they gave me at CSF restored my spirit. How quickly everything moved was entirely up to me.

This surgery was going to cost \$150,000.00; I would have had to sell everything I own. That was heartbreaking. The health problem was going to tear me apart. With CSF, my surgery was less than 10% of the cost.

CSF is so good, it's beyond words. My blessing was that my doctor knew the way to connect me with CSF and its specialists. What CSF offers is extraordinary.
- Gino

I didn't have health insurance, and CSF did a wonderful job with me. I had a mass on my thyroid and several nodules. I have family members in the medical profession, and they told me that with CSF I would be with the best surgeons.

My family couldn't believe how amazing the price was. It was three times less than what I would have paid in cash.

So yes, it was wonderful. There was no difference in the treatment compared to other patients who had health insurance.

I truly enjoyed my experience with CSF and felt comforted.

- Debbie Walker
